

I can't believe what the FCC is attempting to do. I am totally shocked that a weather and traffic station available to us on XM Radio would become an issue or problem for the FCC!

You have allowed D.J.'s on FM radio to talk sexual trash about women and other immoral issues while you just sat silently for many years! Now you turn on a station that gives us "G"- Rated weather and traffic updates? Oh, please.

This has been a blessing for us listeners, to get what "we" pay for. Or could this have anything to do with you or others wanting a slice of the pie somehow? Hmm... makes one wonder.

I am hopeful you will reconsider the FCC's interest in silencing a voice that is only been one of a great service to our communities. It may be of some interest to you to know that my 8 year-old son LOVES listening to the various weather and traffic stations on XM Radio. He would be very unhappy as well as confused, to find out why anyone would want to remove these stations from XM Radio.

Thank you for your time in this matter

Robin Y.
